CAREER SUMMARY

Hi, I'm Dmytro Kuzhel, a Java Software Developer currently based in Warsaw, Poland. I have a strong background in Java and Kotlin development and a track record of delivering business value through new feature implementation, bug fixing, and maintaining CI/CD pipelines. I am highly proficient in Java, Kotlin, Postgresql, Spring Framework, and various other technologies.

WORK EXPERIENCE

Java Software Developer

Revolut

12.2023 - Now

Delivering business value by new feature implementation, business requirement analysis, and bug fixing using Java and Postgresql.

Technologies used:

Java Postgresql

Java/Kotlin Software Developer

Motivlab

11.2020 - 12.2023

Delivered business value by new feature implementation, business requirement analysis, and bug fixing. Ensured product quality by writing automated unit, integration tests, and maintaining CI/CD pipelines. Mentored junior developers and conducted code reviews. Designed architecture for new projects and provided improvements for old ones. Planned sprints.

Java/Kotlin:

Spring Framework JPA Hibernate PostgresDB MSSQL

Software Developer

SITL

9.2018 - 11.2020

Delivered business value by new feature implementation, business requirement analysis, and bug fixing. Enriched system capabilities by integrating external services with already existing systems. Reduced maintenance costs by refactoring code for an already existing high-performance system. Improved UX by implementing GUI to CLI application. Ensured product quality by writing automated unit, integration tests, and maintaining CI/CD pipelines.

Java/Kotlin:

Spring Framework JPA Hibernate Vaadin PostgresDB Oracle PL/SQL

C++:

Qt5 QML CMake General Linux Kernel Knowledge

DevOps:

Ansible Molecule Docker Vagrant VirtualBox Gerrit Bash

Full Stack Developer

Beside The Park

01.2018 - 11.2018

Worked on multiple projects including a driver rating app, refund for air tickets, and procurement management app. Responsibilities included improving product quality by fixing bugs in backend and frontend, delivering admin system management features using Active Admin, reducing system response time by replacing REST queries with GraphQL, generating PDF and DOC report files to enhance user experience, and implementing automatic database configuration to reduce maintenance costs.

Ruby on Rails:

Devise Paperclip Delayed Job Cancancan Active Admin GraphQL Postgres Sidekiq

JavaScript:

Angular React

EDUCATION

Bachelor degree in Sound Engineering

Academy of Journalism and Sound Engineering

2019 - now

Engineer degree in Computer Science: Multimedia

Polish-Japanese Academy of Information Technology

2015 - 2019
